

InnoScreen

InnoScreen

INNOWOOD screen systems offer an exciting alternative to conventional facade design. They provide a softened timber look to internal and external wall surfaces and soffits, which not only greatly enhances their appearance, but also protects the building and its occupants from the harsh sun.

They are ideal for internal and external use in both commercial and residential settings and are easy to install, saving time and money. Delivering a modern classic look, INNOWOOD screen systems are a stylish and practical addition to any outdoor environment.

c	clip fixing Battens push in and clip into place with consistent spacings achieved by the length of the spacer.	profile

f	face & rear fixing Traditional external fixing method that is manually spaced as desired.										

* Guide only, span based on non reinforced section and is dependent on region and wind load.

The tonal shading, colouration and graining variations add to the architectural character and overall visual appearance of the finished installation.
